## Sentinel's Mobile Surveillance Towers offer surveillance and deterrence on an as needed basis.

All units can be outfitted to provide full command and control capabilities for fluid operations whether on the front lines or at hometown events. The units can easily be relocated and are rugged enough to handle even the most primitive off-road conditions. All models are adaptable for cameras, radars, radios, public address systems as well as other equipment.

The units presented in this flyer are available to rent as stand alone or in conjunction with our Mobile Command Vehicle for a comprehensive coverage of large scale events. Ask us about it!

### APPLICATIONS

- Parking Lot Surveillance
- Perimeter and Border Surveillance
- Tactical Reconnaissance
- Crowd Management
- Emergency Response
- Spectator and Community Events
- Force Protection

## Sentinel's Mobile Surveillance Towers (MST) features the following:

Each MST can be rapidly and effectively deployed.

Each MST enables a single officer to operate the observation capsule which may be raised up to twenty-five feet and offers 360-degree visibility.

Each MST can be operated from within the observation capsule and from ground level controls.

Each MST provides shelter from weather elements and is outfitted with heat and air conditioning.

Each MST is equipped with leveling instruments to steady the unit.

Each MST can operate on 120-volt dc power or 20-amp shore power and is equipped with multiple battery charging systems.

Each MST is fitted with long range, HD thermal or infrared cameras that provide real-time surveillance enabling officers to immediately respond and react to activity and provide video evidence to aid in witness testimony.

Each MST is fitted with spotlights to enable nighttime observation.

Each MST is outfitted with a public address system.

Light ballistic prevention armor is available with each MST.
